DETAILED ACTION

Information Disclosure Statement

The Information Disclosure Statement filed on January 25, 2005 has been considered by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Kamoshita. (U.S. Pat. 4,623,596)

Kamoshita teaches a fuel cell manifold assembly having a contact surface with a groove, an O-ring [76] disposed within the groove and adhered against a sealing surface [39] of a fuel cell stack assembly. See col. 3 line 68 to col. 4 line 3 and Figure 4.

Claims 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsumura et al. (U.S. Pat. 4,794,055)

Matsumura et al. teaches a manifold [110] sealed by a dielectric strip, i.e. electrically insulating member [111] against the stack sealing surface. Figure 4 shows that this component has both flat and angled forms. See col. 4 line 38-51.

Allowable Subject Matter

Claims 1-5 and 10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest the claimed combination of a first elastomer, second elastomer and dielectric strip, the first elastomer disposed as a gasket in a groove, with a notch for receiving an endplate to form a sealing surface facing the manifold contact surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Pat. 6,261,711 B1 to Matlock et al. and JP 62-073574 to Miki et al. are cited of cumulative relevance.
